**C.3.h STORMWATER CONTROL INSPECTIONS
WORKSHOP**

Cupertino, CA

Monday, January 23, 2017
Afternoon Session (MRP C.3.h)

1. MRP C.3.h: FY 2016/17 Implementation –Kristin Kerr, SCVURPPP Program Staff

Very Useful 31 Somewhat Useful 10 Not useful 0

Comments:

- Informative
- Provide clear instruction on SCVURPPP practices.
- Would like more details on the different measures
- Good update on changes and implementation requirements
- Thank you for going over new requirements for this fiscal year.
- Very succinct and easy to comprehend; good speaker.

2. Inspection and Maintenance Experience – Gordon Clem, Pacific Stormwater Solutions

Very Useful 23 Somewhat Useful 18 Not useful 1

Comments:

- Hard to hear speaker
- Very good insight
- Interesting!
- Was difficult to stay focused
- Really good to see what to look for on inspections.
- No handout (online)
- Maybe a little too much time/pictures on filters
- Great insight and explanation
- A little unfocused, but lots of good pictures of poorly maintained systems. It would have been nice to understand what to look for and maintenance steps.
- Slides and photos of good and bad one still the best way to communicate what should and shouldn't be done.

- Seems educated about inspection; needs to create a more clear PowerPoint and speak clearly. Overall, decent presentation.

3. Inspections During Construction – Peter Schultze-Allen, SCVURPPP Program Staff

Very Useful 34 Somewhat Useful 7 Not useful 0

Comments:

- Pictures were informative
- Great, very informative
- Show very good examples
- Always love to see all the slides of examples
- Great examples (2)
- The slides and photos were most helpful in understanding the do's and don'ts of C3.
- Helps in self-reflection of my program.
- Too many examples – important to understand what to look for and badly constructed systems, but no information on how to recommend changes to contractor to fix the systems while still in construction.
- Very good PowerPoint and presentation; super detailed with many helpful images.

4. Group Exercise – SCVURPPP Program Staff

Very Useful 22 Somewhat Useful 12 Not useful 0

Comments:

- Include handouts of pictures
- It was good.
- Made things clear
- It was nice to converse with my table on solutions to the problem.
- I thought that this exercise engaged the guest and encouraged critical thinking for future projects. It was very good quality.

5. Did this training meet your expectations? Yes: 39 No: 0

6. What parts of the training were most useful to you?

- Inspections during construction
- The examples
- Seeing photo examples of good and bad
- Filling out inspection forms
- Examples were very useful
- Inspection during construction
- Examples

- All (2)
- Group exercise and the photo examples of good vs bad stormwater designs.
- Kristin and Gordon's presentation
- All were equally helpful/informational
- Visual examples and group exercises w/C3 measures
- Group exercise and presentation by Gordon Clem.
- The practical presentation were most useful to me
- Inspection and maintenance
- All parts will be useful
- Exercise and photo examples
- How to do inspections
- Updated information for annual report and the group exercise.
- Review of MRP
- Construction site runoff
- Inspection during construction
- The images and videos from power points helped quite a bit.
- The inspection and maintenance presentation and installation inspection presentations were the most useful. Especially the installation inspection presentation.
- Group exercise

7. What would have made this training more useful?

- Site visit
- All various types option.
- More slide/photo samples of real-life BMPs, SCMs
- Better photos for exercises
- Fewer examples of LID systems and more information on how to recommend changes to contractors about problem systems.
- More time for Q & A guests. Also, make sure that all slides and diagrams are large enough and legible.
- More videos of good vs bad stormwater flow design systems.
- An official inspection checklist for the MRP Inspection

8. What topics would you recommend for a future training?

- Vendor presentation
- Group exercises helped out a lot.
- All good
- Data collection, tracking

- More SCM types
- Photo examples
- All
- Field inspection example
- More information on GI Infrastructure strategies to implement and how these strategies will be designed.
- Enforcement
- Maintenance agreements
- Pest construction stabilizations, completed examples

9. General Comments?

- More breaks
- Please use coffee cups w/o Styrofoam sleeve (2)
- Lunch was good.
- Thanks!
- Need more breaks, seemed very long.
- Very good and necessary program.
- The meeting was well-structured and organized. We should engage the general public more often to discuss these issues. I would encourage future group projects and exercises to practice these new ideas.
- Excellent presentation
